

FRANÇOIS TROTTIER

François Trottier was born in Montreal, in 1953. His father, the influential artist Roger Trottier, graduated from L'École du Meuble de Montréal during the "Refus Global" period. As a self-taught artist, François has been painting with passion since 1975; but he really decided to approach this second career in 2000, parallel to the first one, acting. He then opened up to the idea of presenting his artwork in galleries: two solo exhibitions in 2002 and 2003 in Montreal proved to be a great success. His work materializes and is then transformed into passion with the certainty that a kind of paternal guide shows him the way.

François Trottier
